

KIRENKUMAR R

Frontend Developer | React.js | JavaScript | Redux

7845928388 | kirenkumar.dev424@gmail.com | linkedin.com/in/kirenkumardev424 | portfolio:kirenkumar.vercel.app | Chennai, Tamil Nadu

PROFESSIONAL SUMMARY

Aspiring Frontend Developer with strong practical expertise in React.js, Redux, JavaScript (ES6+), HTML5, and CSS3. Experienced in building responsive, component-driven web applications with a focus on usability, performance, and reusability. Self-driven learner who takes ownership of features end-to-end — from UI design to deployment.

TECHNICAL SKILLS

Frontend (Core)	React.js, Redux / Redux Toolkit, JavaScript (ES6+), HTML5, CSS3, DOM Manipulation
Styling	Tailwind CSS, Bootstrap, Responsive Design, Flexbox, CSS Grid
State Management	Redux, Context API
Backend Basics	Node.js, Express.js, Python, RESTful APIs, JWT Authentication
Database	MySQL, MongoDB, Firebase
Tools & Workflow	Git, GitHub, VS Code, Antigravity, Cursor, Claude code, Figma, Postman, npm, Vercel, Render
Soft Skills	Self-Driven, Ownership Mindset, Quick Learner, Team Collaboration

PROJECTS

Portfolio Website | *React.js · Node.js · Express.js · MongoDB · Vercel*

- Developed a full-stack personal portfolio with a dynamic admin dashboard to manage projects, skills, and content via CRUD operations.
- Built entirely in JavaScript (React frontend, Node.js/Express backend).
- Deployed frontend on Vercel and backend on Render with MongoDB Atlas as the cloud database.
- Ensured mobile-first, responsive design using Tailwind CSS with optimized component reusability.

College Website | *React.js · Node.js · Firebase · HTML5 · CSS3 · JavaScript*

- Designed and developed a full-featured college website with three dedicated portals — Admin, Student, and Faculty — each with role-based access control.
- Built an Attendance Management System allowing faculty to mark, update, and track student attendance in real time, with Firebase as the live database.
- Implemented an Admin Panel for managing announcements, timetables, faculty records, and student data via CRUD operations.
- Developed a Student Portal for accessing attendance records, notices, academic schedules, and results in a personalised dashboard.
- Achieved fully responsive design using CSS3 and React — optimised for mobile, tablet, and desktop across all portals.
- Used Firebase Authentication for secure multi-role login and Firestore for real-time data sync across portals.

No-Code Web Development SaaS App | *React.js · Node.js · MongoDB · Firebase · HTML5 · CSS3 · JavaScript*

- Built a no-code SaaS platform enabling non-technical users to create fully functional websites via an intuitive drag-and-drop visual builder.
- Developed a dynamic Template Engine with a library of pre-built layouts; users can select, customise, and publish templates without writing any code.
- Engineered a real-time drag-and-drop canvas using React with live preview, allowing element repositioning, resizing, and style editing on the fly.
- Designed a multi-tenant architecture with Firebase Authentication for user accounts and MongoDB for storing project configurations and published site data.
- Implemented reusable, configurable React components (Text, Image, Button, Section) as drag-and-drop building blocks — maximising extensibility.
- Handled backend logic with Node.js/Express.js — managing project save/load, template management APIs, and user session handling.

E-Commerce Web Application | *React.js · Node.js · Express.js*

- Built a production-ready e-commerce application featuring product listing, search/filter, cart, and user authentication.
- Implemented Redux Toolkit for centralized global state management — managing cart, auth session, and product data.
- Designed reusable React components (ProductCard, Modal, Navbar) to maximize code maintainability.
- Connected RESTful APIs built with Express.js and MongoDB to React frontend using `async/await`.

EDUCATION

Bachelor of Science — Computer Science

2023 – 2026

Singai Sithar Ayya College of Arts and Science, A.Thekkur — Sivaganga, Tamil Nadu

Relevant Coursework: Data Structures, Web Technologies, Database Management Systems, Operating Systems

CERTIFICATIONS & COURSES

- React.js — The Complete Guide (Hooks, Context, Redux) — Udemy / FreeCodeCamp
- JavaScript Algorithms and Data Structures — FreeCodeCamp
- Full Stack Web Development (MERN) — Self-paced / Online Platform
- Node.js & Express.js Backend Development — Online Course

KEY HIGHLIGHTS

- Built and deployed 4+ full-stack JavaScript applications (React + Node.js) — live on Vercel/Render with GitHub documentation.
- Portfolio demonstrates end-to-end ownership: UI design, API development, authentication, and deployment — matching GrowSmart's expectation of feature ownership.
- Self-taught MERN stack developer committed to clean, reusable code and best practices in component design.
- Active open-source GitHub profile: github.com/kirenkumar | Portfolio: portfoliokirenkumar.vercel.app
